1.Build a PHP code to store name of students in an array and display it using print_r function. Sort and Display the same using asort & arsort functions.

```
<html>
<body>
<?php
$name = array(' appu ', ' ammu ',' minnu', ' pinki', ' thomas');
echo "display Array(using print_r): ";
echo "<br>";
print_r($name);
echo "<br>";
asort($name);
echo "<br>";
echo "sorted Array(using asort): ";
echo "<br>";
foreach($name as $x => $x_value) {
echo "Key=" . $x . ", Value=" . $x_value;
echo "<br>";
}
arsort($name);
echo "<br>";
echo "sorted Array(using arsort): ";
echo "<br>";
foreach($name as $x => $x_value) {
echo "Key=" . $x . ", Value=" . $x_value;
echo "<br>";
}
?>
</body>
</html>
```
